

Community Access to Resources through Enhanced technology
Application for Provider & Public (CAREAPP)

September 22, 2016

CAREAPP Concept

The social determinants of health are the conditions in which people are born, grow, live & age, and the wider set of forces & systems shaping the conditions of daily life.
 -WHO

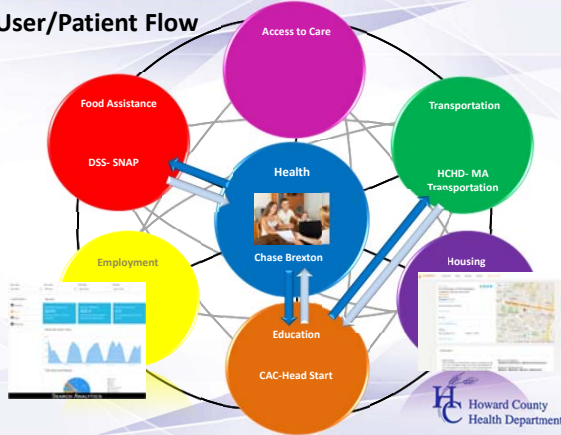

CAREAPP Project

Unique Features:

1. Web-based risk assessment screening tool
2. Updated & searchable community resource directory
3. Electronic bi-directional referral tracking system

User/Patient Flow

CAREAPP Project Hypothesis

If we are able to:

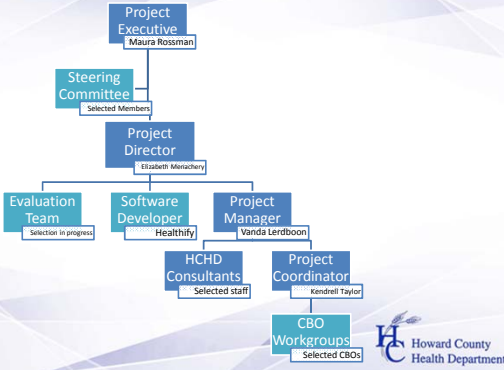

- utilize CAREAPP technology to identify clients' unmet social needs;
- to connect clients to resources more efficiently & effectively;
- to track the clients' referral process completely

Then we expect to:

- Improve the ability to assess individual & community needs for SDOH services
- Improve the ability to enhance care coordination between agencies
- Increase client and provider satisfaction with care coordination services
- Increase identification & understanding of unmet health and social needs in HC
- Reduce health care costs

CAREAPP Governance Structure

 Details about CAREAPP will be presented at the
LHC Community Forum on October 27, 2016.

Thank you!
